

A TRICERATOPS COULDN'T RIDE IN A SCHOOL BUS

ARTWORK BY JOE TUCCIARONE

IMAGE BY DORI

ILLUSTRATED FOR SIZE COMPARISON: Triceratops, one of the last dinosaur species on Earth at the time of the asteroid impact mass extinction 65 million years ago, could grow to be about 10 feet tall and 30 feet long (including its tail), by comparison a conventional school bus today is about 10 feet high and a few feet longer than the dinosaur. Revised February 8, 2007

There are Triceratops fossils with the *Space Rocks* collection that you can hold in your hands.
